Digital transformation advisory across AI implementation, Finance 4.0, and capability building — apply.it

- Led end-to-end implementation of an AI-based client service, collaborating across dev, UX, and PM teams to increase user task efficiency and reduce manual processing time by 30%
- Designed and delivered structured capability-building sessions on generative AI and digital transformation for 120+ professionals across corporate clients, driving measurable gains in internal adoption
- Conducted market analyses and strategic assessments enabling clients to qualify for Finance 4.0 public funding opportunities totalling €320K
- Worked directly with client leadership to translate complex digital challenges into actionable recommendations and implementation roadmaps

Founder & Operations Lead | **Puppy Yoga** | Sardinia | *2024*
Zero-to-one entrepreneurial venture — Sardinia's first Puppy Yoga concept

- Launched and scaled a new consumer experience from concept to market: end-to-end ownership of branding, partnerships, digital marketing, logistics, and customer experience
- Achieved 100% sell-out rate across 22 events, reaching 720 participants in 14 weeks through data-driven digital campaigns and conversion funnel optimization
- Maintained a 5-star average rating across all events, validating product–market fit and operational excellence

EDUCATION

International Master in Digital Innovation & New Business Design
POLIMI Graduate School of Management *2025 – 2026*
Specialization Track: Digital Product & Strategy

- Dreampeasy | Platform Strategy: Co-developed a multi-sided skill-gaming business case using PESTEL/SWOT to identify a Blue Ocean opportunity in the EU; modelled Month-8 break-even via Business Model Canvas and flywheel growth mechanics
- Lifesum | Design Sprint & UX: Acted as Decider in a Design Sprint for digital-physical integration; led user testing rounds validating new features, with measurable reduction in user effort

Bachelor's Degree in Business Economics
University of Cagliari *2021 – 2024*

- Thesis: “Machine Learning and Credit Scoring: Predictive Models for Financial Risk Assessment” – built and evaluated ML classification models (logistic regression, decision trees, random forest) to predict default risk, combining quantitative modelling with business interpretation of results
